

Newsletter

Issue 3 April 2017

Editorial

Dear reader,

This third edition of the SPEED-5G newsletter was originally scheduled to be published in December 2016. There were two important reasons why we had to change the schedule and publish it in April 2017: firstly, our previous coordinating partner, Sistelbanda, unfortunately left the consortium; secondly, after the project review some administrative changes were asked for, including a three-month extension and the identification of a new coordinating partner – which is now University of Surrey - which kept the consortium very busy.

We would like to start the articles in this edition with a brief profile of SPEED-5G's new technical manager, Seiamak Vahid from the University of Surrey. In the next article, Seiamak presents an overview on the four main achievements of SPEED-5G so far. Finally, an outlook of SPEED-5G impact on the EuCNC 2017 conference in Oulu, Finland, is provided.

We hope you find the information in our newsletter informative, and we look forward to any questions or comments you may have. The next newsletter edition will be published at the end of June 2017.

Kind regards,

The SPEED-5G consortium

SPEED-5G's new technical manager - Seiamak Vahid from University of Surrey

Seiamak Vahid is a Senior Research fellow at the University of Surrey in the Institute for Communication Systems (ICS) with a PhD in wireless communications. From 2001, Seiamak worked in the Motorola system division, initially as team leader working on UMTS/HSPA and later on LTE, providing technical solutions to system architecture and UTRAN network design and trial support teams. As ...
